Tips to Create a Prompt

HTML

Understand the Model:
1. Know the latest model version.
2. Familiarize with documentation.
3. Identify capabilities and limitations.

01

Be Specific:
1. Clear instructions on outcome, style, and format.
2. Specify length and constraints.
3. Provide context or examples.

02

Experiment and Fine-Tune:
1. Use different techniques.
2. Try varied words and styles.
3. Select the best-performing approach.

03

Simplify Tasks:
1. Break down complex tasks.
2. Create a sequence of simpler prompts.
3. Enhance model accuracy and comprehension.
